Attend this FREE one hour presentation and learn how this powerful method of healing is accomplishing what traditional medicine can't.

BodyTalk is a relatively new and powerful truly holistic and natural method of physical and emotional healing which can stand alone or compliment western or eastern medicine. BodyTalk allows the body's systems to be re-synchronized so they can operate as nature intended – and effectively respond to injury and illness, often completely healing itself.

As described by the IBA: The body only fails in its job because its communication systems have been severely compromised through the external stresses of life. In essence, the energy circuits are “blown” in a similar manner to electrical circuits in our house that “blow” when they are overloaded. By re-establishing good communication between the various parts of the body, they once

again are able to “talk” to each other. The body is then capable of healing itself more rapidly and effectively.

BodyTalk is for YOU if you experience:

Chronic pain allergies migraines asthma viruses sleep disorders musculoskeletal problems physical injury illness ...

BodyTalk can be effective in preventing illnesses
increasing sports performance.

Many top athletes receive BodyTalk for optimum performance.
